25 YEAR RE-REVIEW
United States Operations Mission to Vietnam

**American Embassy
Saigon, Vietnam**

April 6, 1956

[redacted] Chief
**FBIS Saigon Bureau
Saigon, Vietnam**

Dear [redacted]

This is in response to [redacted] request of April 4th.
I hope it will prove useful.

Information periodically provided by FBIS Saigon Bureau has been of pronounced value to us. It has helped shape our policies and our project planning. It has supplied us with medical intelligence concerning matters of epidemiologic significance. It has kept us abreast of the problems and achievements in preventive medicine and public health which exist in the area north of the 17th parallel. This has guided our own program activities. As a result, I believe that we have been able to accomplish our missions here with greater intelligence and realism.

Sincerely yours,

George J. Stein
Public Health Laboratory Advisor
USOM, Free Vietnam

P.S. Please give my warmest regards to Beth.
